BRITISH JOURNAL OF APPLIED PHYSICS (JOURNAL OF PHYSICS D)

1968—SER. 2, VOL. 1

SUBJECT INDEX

(R) denotes Research Note (L) denotes Letter to the Editor

PAGE

Aberrations of an x-ray focusing camera: second-order theory . . . 393
Accumulation and depletion layers, computer solution . . . 853
Acoustoelectric gain and current in piezoelectric semiconductors, a non-linear theory . 1271
Activation energies of Cr, Fe and Ni in GaAs . . . 593
Aerosols, entry into sampling tubes and heads . . . 921
Air, electrical breakdown (R) . . . 1581
Alkali halide crystals, additively-coloured, electronic conductivity (R) . . . 1571
Alkali halide crystals, additively-coloured, photoconductivity . . . 1615
Alkali halides, measurement of elastic constants . . . 1277
Alkali halides, measurement of isothermal compressibility by a capacitance method (R) . 1059
Alkali halides, temperature dependence of the elastic compliances . . . 1285
Alloys, Cu–Au, friction, wear and surface hardness in abrasion . . . 561
Alloys, Cu–Zn, shock-induced deformation faults . . . 1437
Alloys, Cu$_2$MnAl, ordering temperature (R) . . . 951
Alloys, In–Cd, densities (L) . . . 955
Alloys, Fe–Cr, oxidation, study by glancing-angle x-ray diffraction (L) . . . 387, 1089
Alloys, PbTe–CdTe, p-type, magnetoresistance at 77°K (R) . . . 1064
Alloys, Hg$_3$Te$_3$–In$_2$Te$_3$, electrical properties . . . 831
Alloys, Hg$_3$Te$_3$–In$_2$Te$_3$, phase diagram . . . 299
Alloys, Ni–Fe, longitudinal Kerr magneto-optic effect . . . 1397
Alloys, Nb–Ti, Nb–V and Nb–Zr, x-ray diffraction studies of the effects of deformation . 1645
Alloys, precious metal, for high-temperature electrical resistance strain gauges . . . 1743
Alloys, Ag–Sb, hexagonal, stacking-fault densities . . . 1141
Alloys, SnTe–PbTe, redetermination of lattice parameters by powder x-ray diffraction (L) 129
Alloys, Ti–Nb, superconducting, phase transformations . . . 1145
Alloys, Zn–Cu, Zn–Ag and Zn–Al, Hall-effect measurements . . . 33
Aluminium, high-purity, deformed, low-temperature internal friction . . . 1431
Apparent separation and intensities of two close objects . . . 501
Arc columns, wall-stabilized, boundary conditions . . . 1171
Arcs, in air, Ar and He in a transverse magnetic field, ionization in the cathode-fall region 335
Arcs, d.c., in air, column recovery . . . 343
Arcs, d.c., in nitrogen, wall-stabilized, static and recovery characteristics . . . 751
Arcs, high-current, in a coaxial arc chamber, method of centring (R) . . . 1584
Arcs, low-current, magnetically driven, effects of gas space and electrodes on the motion . 1163
Argon afterglow, ion conversion . . . 889
Argon, ionization coefficients and sparking voltages . . . 179
Argon laser, use in investigation of laser-induced electron emission from tungsten, tantalum and lanthanum hexaboride . . . 711
Arsenic crystals, growth from the vapour and etch pit studies . . . 869
Attachment and ionization coefficients determined from current-growth experiments, effects of detachment and ion–molecule reactions (R) . . . 1587
Attachment and ionization in perfluorobutane (R) . . . 1215
Attapulgite, orientated, in suspension, light-scattering studies . . . 1753

Barite crystals, natural, low-angle grain boundaries . . . 603
Birefringence, magnetic, in thin ferromagnetic films . . . 1679
Bismuth crystals, effect of surface recombination on the magneto-Seebeck effect at 80°K (L) 127
Blast waves, variable-energy, theoretical analysis . . . 1697
Bombardment of a Mo target with rare-gas ions, electronic emission and ionic reflection (in French) . . . 1517
Bombardment of silver with argon ions, electron diffraction study . . . 437

PAGE

Breakdown, electrical, in alkali-metal-seeded rare gases at elevated temperatures and atmospheric pressure 49
Breakdown, electrical, in hot alkali-metal-seeded rare gases (R) 1082
Breakdown, electrical, in mercury vapour 881
Breakdown, electrical, of positive point-to-plane air gaps subjected to fast rising voltage impulses 1505
Breakdown, electrical, of KBr crystals, polythene and air (R) 1581
Breakdown, electrical, of KCl single crystals (R) 121
Breakdown, *see also* Pre-breakdown

Cadmium arsenide, thermomagnetic effects 585
Cadmium sulphide crystals, edge emission 1609
Cadmium sulphide crystals, electrical conductivity storage 1593
Cadmium sulphide crystals, photoconductivity in the vicinity of the absorption edge 1125
Cadmium sulphide films, thin, deposition 983
Cadmium telluride crystals, luminescence emission at 77°K 965
Caesium vapour, microwave cavity studies of ionization decay 409
Calcium tungstate crystals, optical loss coefficients by laser measurements (R) 524
Calorimetric study of the energy dissipated from a metal subjected to fatigue cycles 1737
Capillary models for porous media: two-phase flow in a serial model 1379
Capture of low-energy inert gas ions in polycrystalline tungsten 1323
Carbon, pyrolytic, development of surface orientations and their relation to the friction and wear 1543
Carbon tetrafluoride, growth of ionization current 327
Cathode protrusions formed during pre-breakdown conditioning, electron microscope observations 1731
Cathode, oxide-coated, a unified model which gives prominence to the role of localized surface states on small crystals 1245
Cavitation bubbles in degassed tetrachloroethylene, experimental data (R) 255
Cavitation, ultrasonic, using a pulsed neutron source 247
Cement paste drying under the influence of temperature gradients, the role of moisture diffusion 1769
Charge transfer in GaAs crystals (L) 390
Chemisorption of hydrogen on rhenium 169
Circuits, LCR, pulsed, with appreciable skin impedance, analysis of transients 901
Cobalt films, thin, the transverse Kerr effect and its application to a simple hysteresis loop plotter (R) 945
Composite materials, fibre-reinforced, calculation of elastic constants 1039
Composite materials, load transfer from broken fibres 1049
Compressibility, isothermal, of alkali halides, measurement by a capacitance method (R) 1059
Concrete, diffusion of water at temperatures between 50 and 95°C 507
Condensation pumping of hydrogen and deuterium on to liquid-helium-cooled surfaces 361
Conductivity, electrical, *see* Electrical conductivity
Conductivity, thermal, *see* Thermal conductivity
Contact potential difference between polycrystalline tungsten foil and vapour-deposited films of tungsten on glass 1241
Contacts, metal–silicon, barrier heights (R) 1841
Copper, effect of impurities on the internal friction peak P_1 (R) 1578
Copper films, thin, effect of absorbed argon (R) 1071
Coronae, d.c., role of electron attaching impurities 1721
Crystals, alkali halide, additively-coloured, electronic conductivity (R) 1571
Crystals, alkali halide, additively-coloured, photoconductivity 1615
Crystals, As, growth from the vapour and etch pit studies 869
Crystals, barite, natural, low-angle grain boundaries 603
Crystals, Bi, effect of surface recombination on the magneto-Seebeck effect at 80°K (L) 127
Crystals, CdS, edge emission 1609
Crystals, CdS, electrical conductivity storage 1593
Crystals, CdS, photoconductivity in the vicinity of the absorption edge 1125
Crystals, CdTe, luminescence emission at 77°K 965

PAGE
Crystals, CaWO$_4$, optical loss coefficients by laser measurements (R) . . . 524
Crystals, diamond, etching of trigons on the (111) faces . . . 1445
Crystals, diamond, synthetic, etching rates on different forms . . . 505
Crystals, gallium, coefficient of self diffusion (R) . . . 515
Crystals, GaAs, charge transfer (L) . . . 390
Crystals, GaAs doped with Cr, photoconductivity and infra-red quenching . . . 29
Crystals, InSb, propagation of helicon waves . . . 1637
Crystals, PbTe doped with Na, drift mobility of light-mass holes (R) . . . 1067
Crystals, MgO, electrical conductivity at low temperatures . . . 441
Crystals, magnetically anisotropic, motion in a rotating magnetic field (R) . . . 381
Crystals, Hg$_5$In$_2$Te$_8$, elastic constants (R) . . . 1079
Crystals, MoS$_2$, lattice parameter measurements (R) . . . 936
Crystals, MoS$_2$, synthetic, optical absorption properties (R) . . . 1222
Crystals, MoS$_2$, thin, photovoltage . . . 1619
Crystals, KBr, electrical breakdown (R) . . . 1581
Crystals, KCl, electrical breakdown (R) . . . 121
Crystals, proustite, electro-optic effect (R) . . . 949
Crystals, quartz, measurement of the Pockels effect at 9 GHz . . . 707
Crystals, rutile, effect of hydrogen on the electrical properties . . . 1151
Crystals, sapphire, measurement of principal dielectric constants by a mechanical action method (L) . . . 669
Crystals, SnSe$_2$, optical properties . . . 837
Crystals, YAG, optical loss coefficients by laser measurements (R) . . . 524
Crystals, ZnS, positive-hole lifetimes and infra-red enhancement of electroluminescence . 1625
Crystals, ZnS, temperature dependence of infra-red enhanced electroluminescence . . . 1631
Crystals, ZnWO$_4$ doped with Cr^{3+}, electric broadening of electron paramagnetic resonance lines . . . 41

Damping, magnetic, in terbium . . . 1005
Deconvolution of experimental curves . . . corr. 136
Deconvolution of physical data . . . 237
Deformation bands in polyethylene terephthalate . . . 1369
Deformation faults, shock-induced, in 70/30 Cu–Zn alloy . . . 1437
Deformation of Nb superconducting alloys, x-ray diffraction studies . . . 1645
Densities of In–Cd solid solutions (L) . . . 955
Depletion and accumulation layers, computer solution . . . 853
Deposition of CdS thin films . . . 983
Desorption, thermal, of helium from rhenium and platinum . . . 1509
Deuterium, condensation pumping on to liquid-helium-cooled surfaces . . . 361
Diamond crystals, etching of trigons on the (111) faces . . . 1445
Diamond crystals, synthetic, etching rates on different forms . . . 505
Diamond, synthetic, reduction of electron-spin-resonance linewidths (R) . . . 373
Dielectric absorption of liquids at wavelengths of 4 and 2 mm (R) . . . 511
Dielectric constant of zirconia (L) . . . 671
Dielectric constants of sapphire, measurement by a mechanical action method (L) . . . 669
Dielectric liquids, polarization currents . . . 491
Dielectric properties of insulators . . . 1109
Diffraction, *see* Electron diffraction, X-ray diffraction
Diffusion coefficient of Cs$_2^+$ ions in Cs vapours, time-of-flight determination . . . 313
Diffusion coefficient and mobility of electrons in N$_2$ and H$_2$ . . . 763
Diffusion of moisture in the drying of cement paste under the influence of temperature gradients . . . 1769
Diffusion of water in concrete at temperatures between 50 and 95°c . . . 507
Diode, GaAs, infra-red sensitive, made by diffusion of Cr . . . 25
Discharge, corona, in hydrogen-filled stabilizer tubes of type SC1, observations of sheath radius (R) . . . 1073
Discharge, d.c., externally excited, effect of external radiations on the leakage time constant (R) . . . 519
Discharge, dipole, self-sustaining, in oxygen . . . 775

PAGE
Discharge, radio-frequency, determination of temperature using a reversal technique 479
Discharges, electrical, in gases, theory of the positive column including space-charge effects 1357
Discharges, glow, pseudo-glow and spark, in helium under a.c. conditions (R) 659
Discharges, long-time-lag, in a triggered spark gap in air 1501
Discharges, pre-breakdown, in d.c. coronae 1721
Distortion coefficient of electron probe-forming and projector lenses 1549
Domain wall motion in square-loop ferrites 821
Domains, high-field, in GaAs, transient and non-linear analysis 973
Domains, magnetic (Review, in German) 1

Elastic compliances of some alkali halides, temperature dependence 1285
Elastic constants of some alkali halides, measurement 1277
Elastic constants of an isotropic matrix reinforced with imperfectly oriented fibres 799
Elastic constants of a unidirectional fibre-reinforced composite 1039
Elastic constants of $Hg_5In_2Te_8$ (R) 1079
Elastic moduli of Ni–Zn and Mn–Zn ferrites at low temperatures (R) 1213
Electrical breakdown, *see* Breakdown, electrical
Electrical conduction in liquid air and liquid nitrogen 1011
Electrical conductivity of alkali-metal-seeded rare gases, effect of bulk gas 189
Electrical conductivity in dust-laden gases, photoelectric enhancement 193
Electrical conductivity of MgO at low temperatures 441
Electrical conductivity storage in CdS crystals 1593
Electrical discharges in gases, theory of the positive column including space-charge effects 1357
Electrical polarization, shock-induced, in water 1183
Electrical properties of annealed films of InAs (R) 939
Electrical properties of Hg_3Te_3–In_2Te_3 alloys 831
Electrical properties of rutile crystals, effect of hydrogen 1151
Electrical resistance strain gauges for use at high temperatures 1743
Electrical resistivity changes during epoxy resin cure, interpretation (R) 117
Electroluminescence, high-efficiency d.c., in ZnS (Mn, Cu) powders (L) 134
Electroluminescence in ZnS crystals, infra-red enhancement and positive-hole lifetimes 1625
Electroluminescence in ZnS crystals, infra-red enhanced, temperature dependence 1631
Electromagnetic flowmeter equation, solutions for cylindrical geometries 895
Electromagnetic gun, coaxial, with positive central electrode, a simple model 1487
Electromagnetic waves in a plasma, non-linear cross modulation due to time-dependent electron density 55
Electron diffraction, observation of fine structure surrounding the undiffracted beam 207
Electron diffraction from a permalloy crystal (R) 1569
Electron diffraction from a single crystal of magnetite, use in determination of the easy magnetization direction (R) 380
Electron diffraction study of the effect of argon ion bombardment on silver 437
Electron emission from charged dust particles, contribution due to field emission 1303
Electron emission, laser-induced, from tungsten, tantalum and lanthanum hexaboride 711
Electron lenses, relation between spherical aberration and distortion coefficients 1549
Electron microscope observations of cathode protrusions formed during pre-breakdown conditioning 1731
Electron microscopy, scattering of electrons by specimen-supporting films and effect of this on Fresnel fringe formation 87
Electron paramagnetic resonance lines of Cr^{3+} in $ZnWO_4$, electric broadening 41
Electron-probe microanalysis, absorption and atomic number corrections 673
Electron-probe microanalysis, absorption correction functions 529
Electron-probe microanalysis, electron penetration and atomic number correction 685
Electron-probe microanalysis of metal oxides: comparison of correction methods 873, corr. 1590
Electron-probe microanalysis, quantitative, accuracy of results 541
Electron-probe microanalysis of thin films 1651
Electron spin resonance in synthetic diamond, reduction of linewidths (R) 373
Electronic conductivity of additively-coloured alkali halide crystals (R) 1571
Electronic emission and ionic reflection from a Mo target bombarded by rare-gas ions (in French) 1517

PAGE

Electro-optic effect in proustite (R) 949
Ellipsometric measurement of the thickness of thin oxide films on Cu 1673
Epitaxial films of ZnS, growth by evaporation in ultra-high vacuum 11
Epitaxial films of ZnS, growth on Si by vacuum evaporation 283
Epoxy resins, electrical resistivity changes occurring during cure (R) 117
Etch pit studies in As single crystals 869
Etching rates on different forms of synthetic diamond 505
Etching of trigons on the (111) faces of diamond 1445
Evaporation of water from soil, analysis 1779

Faraday effect, free-carrier, microwave, in piezoelectric semiconductors 1603
Faraday effect for hot electrons in semiconductors (R) 521
Faraday effect in rare-earth iron garnets in the far infra-red 741
Fatigue in metals, calorimetric study of the energy dissipated during fatigue tests 1737
Ferrites, Ni–Zn and Mn–Zn, elastic moduli at low temperatures (R) 1213
Ferrites, polycrystalline, magnetostatic energy 987
Ferrites, square-loop, domain wall motion 821
Ferromagnetic films, coupled, transverse initial susceptibilities (R) 942
Ferromagnetic films, thin, effect of azimuth variation on hysteresis loops obtained from the transverse Kerr effect (R) 656
Ferromagnetic films, thin, magnetic birefringence 1679
Ferromagnetic resonance in thin magnetic films 1389
Field emission from negatively charged solid particles 1303
Films, ferromagnetic, coupled, transverse initial susceptibilities (R) 942
Films, GaAs, high-mobility, growth by liquid-phase epitaxy (R) 115
Films, InAs, annealed, electrical properties (R) 939
Films, Nb, cylindrical, flux jumping phenomena 995
Films, polyethylene, drawn, investigation of the orientation distribution functions by broad-line nuclear magnetic resonance 1529
Films, polymer, photoresist, scattering effects in ion beam exposure 1657
Films, ZnS, epitaxial, growth by evaporation in ultra-high vacuum 11
Films, ZnS, epitaxial, growth on Si by vacuum evaporation 283
Films, thin, CdS, deposition 983
Films, thin, Co, the transverse Kerr effect and its application to a simple hysteresis loop plotter (R) 945
Films, thin, Cu, effect of absorbed argon (R) 1071
Films, thin, electron-probe microanalysis 1651
Films, thin, ferromagnetic, effect of azimuth variation on hysteresis loops obtained from the transverse Kerr effect (R) 656
Films, thin, ferromagnetic, magnetic birefringence 1679
Films, thin, InAs, optical properties 15
Films, thin, magnetic, ferromagnetic resonance 1389
Films, thin, magnetic, flux linkage with a rectangular coupling loop 211
Films, thin, magnetite, thermal conductivity 1117
Films, thin, metal, deposition from a beam of positively charged ions 457
Films, thin, metal, thermoelectric and mean free path effects (R) 1837
Films, thin, permalloy, optimization of properties for computer memories 1685
Films, thin, optical reflection and transmission formulae 1667
Films, thin, oxide, on Cu, ellipsometric measurement of thickness 1673
Flow of liquids and gases through granular beds of spheres and irregular particles 1559
Flux jumping phenomena in sputtered cylindrical Nb films 995
Fracture of solids, relation to the total potential energy 217
Friction in the abrasion of Cu–Au alloys 561
Friction, internal, in Cu, effect of impurities on the P$_1$ peak (R) 1578
Friction, internal, of plastically deformed Al at low temperatures 1431
Friction, internal, in zone-refined Ni, influence of hydrogen (R) 1075
Friction of polymers, effect of carbon fibre reinforcement 549
Friction of pyrolytic carbon 1543
Fused mixtures of MnCl$_2$ and alkali chlorides, magnetic properties (R) 1839

PAGE
Gallium arsenide, activation energies of Cr, Fe and Ni impurities 593
Gallium arsenide, formation of abrupt junctions by solid-to-solid diffusion of Zn (R) . 113
Gallium arsenide, transient and non-linear analysis of high-field domains . . . 973
Gallium arsenide crystals, charge transfer (L) 390
Gallium arsenide crystals doped with Cr, photoconductivity and infra-red quenching . 29
Gallium arsenide films, high-mobility, growth by liquid-phase epitaxy (R) 115
Gallium arsenide infra-red sensitive diode made by diffusion of Cr 25
Gallium monocrystals and polycrystals, coefficient of self diffusion (R) 515
Garnets, iron, rare-earth, far infra-red Faraday effect 741
Gas mixtures, $Ar–C_2H_6$, ionization coefficients and sparking voltages 179
Gases, dust-laden, photoelectric enhancement of electrical conductivity 193
Gases, flow in a microporous medium 1379
Gases, flow through granular beds of spheres and irregular particles 1559
Glass, Nd-doped, measurement of cross section for stimulated emission 449
Glow, pseudo-glow and spark discharges in helium under a.c. conditions (R) . . . 659
Grain boundaries, low-angle, in natural barite single crystals 603
Grid blackout in u.h.f. pencil triodes, dynamic behaviour 781
Gunn effect in GaAs, phenomenological aspects 973

Hall-effect measurements in zinc-base alloys 33
Heat transfer through a three-phase porous medium (R) 815
Helicon waves, propagation in InSb crystals 1637
Helium, discharges under a.c. conditions (R) 659
Helium, thermal conductivity using a hot-wire type of thermal diffusion column . . 1341
Helium, thermal desorption from rhenium and platinum 1509
Helium plasma, non-equilibrium, optimum seeding with caesium (R) 375
Heterojunctions, n–n, abrupt, analysis 853
Hexafluoroethane, growth of ionization current 327
Hexane, behaviour of negative charge carriers 63
Hydrogen, chemisorption on rhenium 169
Hydrogen, condensation pumping on to liquid-helium-cooled surfaces 361
Hydrogen, ratio of diffusion coefficient to mobility for electrons 763
Hydrogen, formative time lags (R) 1852
Hysteresis loops of thin ferromagnetic films, obtained from the transverse Kerr effect, effect of azimuth variation (R) 656

Indium antimonide crystals, propagation of helicon waves 1637
Indium antimonide, photoconductivity at 10·6 μm wavelength 149
Indium arsenide films, annealed, electrical properties (R) 939
Indium arsenide films, thin, optical properties 15
Inert gas ions, low-energy, penetration and capture in polycrystalline tungsten . . . 1323
Infra-red quenching in Cr-doped semi-insulating GaAs 29
Insulating stacks, mechanically-strong, optimum apparent areas for thin-layer elements (R) 1845
Insulators, temperature coefficient of capacitance 1109
Interference effects due to low-power laser heating in solids and liquids (R) . . . 1575
Intermolecular potentials of some polar organic vapours 71
Ion beam exposure of photoresist polymer films, scattering effects 1657
Ion conversion in an argon afterglow 889
Ion motion in a gas subjected to a constant electric field, stochastic computer simulation (R) 1567
Ion optics of mass spectrometers for electrostatic field analyser 99
Ion optics of mass spectrometers for normal incidence on magnetic fields 1801
Ion optics of mass spectrometers for oblique incidence on magnetic fields 1813
Ionic reflection and electronic emission from a Mo target bombarded by rare-gas ions (in French) 1517
Ionization and attachment coefficients determined from current-growth experiments, effects of detachment and ion–molecule reactions (R) 1587
Ionization and attachment in perfluorobutane (R) 1215
Ionization in the cathode-fall region of moving arcs 335
Ionization coefficient, primary, in neon (R) 1219

PAGE
Ionization coefficients, primary and secondary, in Ar and Ar–C_2H_6 mixtures 179
Ionization coefficients, primary and secondary, in nitrogen 769
Ionization cross section, associative, of mercury vapour (R) 258
Ionization currents in CF_4 and C_2F_6, growth 327
Ionization decay in Cs vapour, microwave cavity studies 409
Ionization growth times in neon, analysis 319
Iron garnets, rare-earth, far infra-red Faraday effect 741
Iron, pure, lattice parameter anomalies at the Curie point 1291
Isotopic abundances of oxygen in CO_2, calculation from mass spectrometer measurements 1793

Joshi effect under pulsed illumination (R) 813

Langmuir probe at low pressures, transient response 351
Laser crystals, $CaWO_4$ and YAG, optical loss coefficients (R) 524
Laser heating, low-power, interference effects in solids and liquids (R) 1575
Laser, Nd in $CaWO_4$, slowly *Q*-switched, output characteristics (R) 1849
Laser, ruby, *Q*-switched, damage associated with a liquid Raman frequency changer (R) 933
Laser, ruby, *Q*-switched, use in triggering a pressurized spark gap 1711
Lasers, ruby and argon, use in investigation of laser-induced electron emission from tungsten, tantalum and lanthanum hexaboride 711
Lattice parameter anomalies at the Curie point of pure iron 1291
Lattice parameter measurements on MoS_2 single crystals (R) 936
Lattice parameters, absolute measurement by X-ray interferometer 1405
Lattice parameters of SnTe–PbTe alloys, redetermination by powder X-ray diffraction (L) 129
Lead telluride crystals doped with Na, drift mobility of light-mass holes (R) 1067
Light flux, measurement by photon counting 1459
Light-scattering photometer, accurate calibration 1201
Light-scattering studies on suspensions of orientated attapulgite 1753
Line-shape parameters, determination using a reflection echelon 1353
Liquefied argon, ion mobility and liquid motion 1019
Liquid air and liquid nitrogen, electrical conduction 1011
Liquid motion and ion mobility in liquefied argon 1019
Liquids, dielectric absorption at wavelengths of 4 and 2 mm (R) 511
Liquids, dielectric, polarization currents 491
Liquids, flow through granular beds of spheres and irregular particles 1559
Liquids, interference effects due to low-power laser heating (R) 1575
Load transfer from broken fibres in composite materials 1049
Luminescence emission of CdTe single crystals at 77°K 965
Luminescence, *see also* Electroluminescence, Photoluminescence, Sonoluminescence

Magnesium oxide monocrystals and polycrystals, electrical conductivity at low temperatures 441
Magnetic birefringence in thin ferromagnetic films 1679
Magnetic damping in terbium 1005
Magnetic domains (Review, in German) 1
Magnetic fields, dipole and quadrupole, planar, produced by line currents 1031
Magnetic films, thin, ferromagnetic resonance 1389
Magnetic films, thin, flux linkage with a rectangular coupling loop 211
Magnetic properties of fused mixtures of $MnCl_2$ and alkali chlorides (R) 1839
Magnetically anisotropic crystal, motion in a rotating magnetic field (R) 381
Magnetically saturated polycrystalline materials, form effect in prolate spheroids 631, 789
Magnetite films, thin, thermal conductivity 1117
Magnetite single crystal, easy magnetization direction revealed by electron diffraction (R) 380
Magneto-optic effect in Ni-rich Ni–Fe alloys 1397
Magnetoresistance in a p-type PbTe–CdTe alloy at 77°K (R) 1064
Magneto-Seebeck effect in Bi at 80°K, effect of surface recombination (L) 127
Magnetostatic energy associated with a polycrystalline ferrite 987
Maser oscillator, molecular beam, operated with two cavities in series, characteristics 727
Mass spectra, computed peak shapes 1825
Mass spectrometer measurements of the abundances of oxygen isotopes in CO_2 1793

PAGE
Mass spectrometers, ion optics for electrostatic field analyser 99
Mass spectrometers, ion optics for normal incidence on magnetic fields 1801
Mass spectrometers, ion optics for oblique incidence on magnetic fields 1813
Mercury vapour, associative ionization cross section (R) 258
Mercury vapour, electrical breakdown 881
Metal crystals, solid solution hardening 303
Metal films, thin, deposition from a beam of positively charged ions 457
Metal films, thin, thermoelectric and mean free path effects (R) 1837
Metal oxides, electron-probe microanalysis: comparison of correction methods 873, corr. 1590
Metals, calorimetric study of the energy dissipated during fatigue tests 1737
Metals, x-ray mass absorption coefficients 695
Microanalysis, electron-probe, absorption and atomic number corrections 673
Microanalysis, electron-probe, absorption correction functions 529
Microanalysis, electron-probe, electron penetration and atomic number correction . . 685
Microanalysis, electron-probe, of metal oxides: comparison of correction methods 873, corr. 1590
Microanalysis, electron-probe, quantitative, accuracy of results 541
Microanalysis, electron-probe, of thin films 1651
Microwave cavity studies of ionization decay in Cs vapour 409
Microwave cavity, TM$_{010}$, cylindrical, calibration and use in the measurement of electron density in a long discharge tube 1495
Microwave free-carrier Faraday effect in piezoelectric semiconductors 1603
Microwave generators, semiconductor (Review) 265
Milne problem, with capture, theory for isotropic scattering 137
Mobility and diffusion coefficient of electrons in N$_2$ and H$_2$ 763
Mobility, drift, of light-mass holes in PbTe heavily doped with Na (R) 1067
Mobility of ions and liquid motion in liquefied argon 1019
Moiré patterns formed by inclined gratings 913
Molecular beam maser oscillator operated with two cavities in series, characteristics . . 727
Molybdenum disulphide crystals, lattice parameter measurements (R) 936
Molybdenum disulphide crystals, synthetic, optical absorption properties (R) . . . 1222
Molybdenum disulphide crystals, thin, photovoltage 1619

Neon, analysis of ionization growth times 319
Neon, primary ionization coefficient (R) 1219
Neutron-induced cavitation effect in tetrachloroethylene 247
Neutron transport theory, a new synthetic scattering kernel 957
Neutrons, 14·7 MeV, total cross sections (L) 1091
Nickel, thermal conductivity at high temperatures by the Jain and Krishnan method . . 573
Nickel, zone-refined, influence of hydrogen on the internal friction (R) 1075
Niobium alloys, superconducting, x-ray diffraction studies of the effects of deformation . 1645
Niobium films, cylindrical, flux jumping phenomena 995
Niobium, superconducting, surface structure and a.c. losses 1477
Nitrogen, primary and secondary ionization coefficients 769
Nitrogen, ratio of diffusion coefficient to mobility for electrons 763
Nuclear magnetic resonance, broad-line, use in investigation of the orientation distribution functions in drawn polyethylene 1529

JANUARY 1968

REVIEW ARTICLES PAGE

Magnetische Bereiche (6 plates) . . . . W. Andrä 1

PAPERS

Epitaxial growth of cubic ZnS by evaporation in ultra-high vacuum (1 plate) . . . B. A. Unvala, J. M. Woodcock and D. B. Holt 11
Optical properties of thin films of indium arsenide . . . R. P. Howson 15
A gallium arsenide infra-red-sensitive diode made by the diffusion of chromium. . . . P. R. Selway and J. Franks 25
Photoconductivity and infra-red quenching in chromium-doped semi-insulating gallium arsenide . . . D. R. Heath, P. R. Selway and C. C. Tooke 29
Hall-effect studies in zinc-base alloys . . . J. Stringer and G. S. Lane 33
Electric broadening of the electron paramagnetic resonance lines of Cr^{3+} in zinc tungstate . . . B. F. Jones, W. S. Moore and J. Neal 41
Breakdown voltage measurements in alkali-metal-seeded rare gases at elevated temperatures and atmospheric pressure . . . H. I. Ellington 49
Non-linear cross modulation of electromagnetic waves in a plasma due to time-dependent electron density . . . M. S. Sodha and B. K. Sawhney 55
The behaviour of negative charge carriers in hexane . . . V. Essex and P. E. Secker 63
Intermolecular potentials and viscosities of some polar organic vapours . . . A. K. Pal and A. K. Barua 71
A study of the errors due to shear and rotatory inertia in the determination of Young's modulus by flexural vibrations . . . D. Hardie and R. N. Parkins 77
Scattering by specimen-supporting films in electron microscopy and its effect on Fresnel fringe formation (2 plates) . . . K. Sugihara, Y. Harada, H. Yotsumoto, A. Fukami and K. Kanaya 87
Ion optics of mass spectrometers: I—Electrostatic fields . . . B. S. Prahallada Rao 99

RESEARCH NOTES

Abrupt junctions formed in gallium arsenide by solid-to-solid diffusion G. R. Antell 113
High-mobility gallium arsenide grown by liquid-phase epitaxy . . . A. R. Goodwin, J. Gordon and C. D. Dobson 115
The interpretation of electrical resistivity measurements during epoxy resin cure. . . . R. A. Fava and A. E. Horsfield 117
Directional electric breakdown of KCl single crystals (1 plate) . . . R. Cooper and C. T. Elliott 121

BOOK REVIEWS 125

LETTERS TO THE EDITOR

Effect of surface recombination on the magneto-Seebeck effect in bismuth at 80°K . . . M. E. Ertl 127
A redetermination of the lattice parameters of $Pb_xSn_{1-x}Te$ alloys . N. R. Short 129
The dependence of the spherical aberration coefficient of an electron-optical objective lens on object position and magnification . . . P. W. Hawkes 131
High-efficiency d.c. electroluminescence in ZnS (Mn, Cu) . . . A. Vecht, N. J. Werring and P. J. F. Smith 134

CORRIGENDUM

A practical method for the deconvolution of experimental curves . . . A. F. Jones and D. L. Misell 136

FEBRUARY 1968

PAPERS PAGE

The thermal-neutron Milne problem with capture . . . M. J. Lancefield and P. Schofield 137
Photoconductivity in indium antimonide at 10·6 μm wavelength . . . A. F. Gibson, M. J. Kent and M. F. Kimmitt 149
Photoemission from GaAs–Cs–O . . . A. A. Turnbull and G. B. Evans 155
High-speed solid-state thermal switches based on vanadium dioxide . . . R. G. Cope and A. W. Penn 161
Chemisorption of hydrogen on rhenium . . . K. F. Poulter and J. A. Pryde 169
The possibility of using molten salts for thermoelectric generation . K. Cornwell 173
Ionization coefficients and sparking voltages in argon and argon–ethane mixtures . . . A. E. D. Heylen 179

PAGE
The effect of the bulk gas on the electrical conductivity of potassium-seeded non-equilibrium plasmas . . . . H. I. ELLINGTON 189
Photoelectric enhancement of electrical conductivity in dust-laden gases . . . . S. GUHA and P. K. KAW 193
Experimental observations on the angular distribution of scattered radiation from suspensions containing particles of a size comparable with the wavelength . . . . G. W. HEPPLESTONE and P. C. LEWIS 199
The observation of fine structure surrounding the undiffracted beam in electron diffraction (1 plate) . . . . R. P. FERRIER and R. T. MURRAY 207
Flux linkage of magnetic thin film with rectangular coupling loop . B. C. REARDON 211
Nature of fracture in relation to the total potential energy . . . M. WNUK 217
Deconvolution of physical data . . . . L. MOORE 237
Some experiments on ultrasonic cavitation using a pulsed neutron source . . . . C. WEST and R. HOWLETT 247

RESEARCH NOTES

Cavitation bubble dynamics—some experiments and computations . . . . C. WEST and R. HOWLETT 255
Measurement of the associative ionization cross section of mercury vapour . . . . K. L. TAN and A. VON ENGEL 258
BOOK REVIEWS 260

LETTERS TO THE EDITOR

Sound distribution at low frequencies in a rectangular enclosure . . . . R. G. HARLOW and P. STREET 263

MARCH 1968

REVIEW ARTICLES

PAGE
Semiconductor microwave generators . . . . C. HILSUM 265

PAPERS

The epitaxial growth of zinc sulphide on silicon by vacuum evaporation (2 plates) . . . . . P. L. JONES, C. N. W. LITTING, D. E. MASON and V. A. WILLIAMS 283
Formation and structure of the potassium graphites (1 plate) . . . . D. E. NIXON and G. S. PARRY 291
Phase diagram of the alloy system Hg_3Te_3–In_2Te_3 . P. M. SPENCER and B. RAY 299
Solid solution hardening of metal crystals . . . . . P. FELTHAM 303
Stopping cross-section measurements in carbon using recoil ions from radioactive decay . . . . . . D. H. POOLE, A. G. WARNER, R. HANCOCK and R. L. WOOLLEY 309
Time-of-flight determination of the diffusion coefficient of Cs_2^+ ions in caesium vapours . . . . I. POPESCU, N. NICULESCU and A. POPESCU 313
On the analysis of ionization growth times in neon R. D. DAVIES and C. J. EVANS 319
Growth of ionization currents in carbon tetrafluoride and hexafluoroethane . . . . S. E. BOŽIN and C. C. GOODYEAR 327
Ionization in the cathode-fall region of moving arcs . . . . D. J. HAMILTON and A. E. GUILE 335
Column recovery of wall-stabilized d.c. arcs in air K. R. HEARNE and M. RASUL 343
Transient response of the Langmuir probe at low pressures . . . . P. R. SMY and J. R. GREIG 351
Condensation pumping of hydrogen and deuterium on to liquid-helium-cooled surfaces . . . . J. N. CHUBB, L. GOWLAND and I. E. POLLARD 361

RESEARCH NOTES

Photoconductivity due to localized excitation D. V. EDDOLLS and H. C. WRIGHT 371
The reduction of electron-spin-resonance linewidths in synthetic diamond . . . . B. R. ANGEL and M. J. A. SMITH 373
Optimum seeding of a non-equilibrium helium plasma with caesium . . . . S. GUHA and P. K. KAW 375
Vacuum insulation between very cold niobium electrodes . . . . J. S. T. LOOMS, R. J. MEATS and D. A. SWIFT 377
Determination of the easy magnetization direction of a ferrite by reflection electron diffraction (1 plate) . . . . S. YAMAGUCHI 380
Motion of an anisotropic crystal in a rotating magnetic field . . . . S. G. WHITTINGTON and S. J. GILL 381
BOOK REVIEWS 385

PAGE

LETTERS TO THE EDITOR

Comments on the paper 'The application of a glancing-angle x-ray diffraction film technique to the study of the low-temperature oxidation of iron–chromium alloys' . R. J. Pearce and W. R. Price 387
Charge transfer in gallium arsenide . . . . . . A. E. Attard 390

APRIL 1968

PAPERS

PAGE

The aberrations of a focusing x-ray diffraction instrument: second-order theory . . . B. Gale 393
Microwave cavity studies of ionization decay in caesium vapour . . . J. H. Harris and D. Balfour 409
Measurements of K, L and M shell x-ray production efficiencies . . . M. Green and V. E. Cosslett 425
A low-energy electron-diffraction study of the effect of argon-ion bombardment on silver (1 plate) . . . . . . A. E. Curzon and T. E. Gallon 437
The electrical conductivity of magnesium oxide at low temperatures . . . T. J. Lewis and A. J. Wright 441
Measurement of the cross section for stimulated emission in neodymium-doped glass from the output of a free-running laser oscillator . . . . J. G. Edwards 449
A low-energy ion source for the deposition of chromium (1 plate) . B. A. Probyn 457
Photoluminescence, photoelectric emission and enhanced thermionic emission from strontium oxide . . . . M. D. Jones and C. H. B. Mee 467
The capture and identification of particles in a vacuum gap . . . R. E. Hurley and T. M. Parnell 473
Determination of temperature in a radio-frequency discharge using a reversal technique . . . P. D. Johnston 479
Study of dense plasmas by double floating probe method . . . V. K. Rohatgi 485
'Polarization' currents in liquid dielectrics . . . . . . M. J. Morant 491
Determination of particle sizes and strains from three different diffraction parameters . . . G. B. Mitra and N. K. Misra 495
Apparent separation and intensities of two close objects . . . M. S. Sodha and A. K. Aggarwal 501
Comparative study of etching rates on different forms of synthetic diamond . . . A. R. Patel and N. Ramachandran 505
Some further comments on the paper 'The diffusion of water in concrete at temperatures between 50 and 95°c' . . . A. C. Jason 507

RESEARCH NOTES

Measurement of dielectric absorption at wavelengths of 4 and 2 mm . . . R. A. Crump, A. Kisza and A. H. Price 511
Self diffusion in gallium . . . . A. C. Carter and C. G. Wilson 515
Effect of external radiations on the leakage time constant in an ozonizer discharge and the associated Joshi effect . H. J. Arnikar, P. L. Kanitkar and C. Mande 519
Hot-electron Faraday effect in semiconductors . . . A. K. Arora 521
A possible contribution to light loss in calcium tungstate and yttrium aluminium garnet laser crystals by scattering (1 plate) . . . . D. J. Keast and B. E. Storey 524
BOOK REVIEWS 527

MAY 1968

PAPERS

PAGE

An evaluation of absorption correction functions for electron probe microanalysis . . . C. A. Andersen and D. B. Wittry 529
An examination of quantitative electron-probe microanalysis accuracy . . . W. J. M. Salter 541
The effect of carbon fibre reinforcement on the friction and wear of polymers (1 plate) . . . J. K. Lancaster 549
Friction, wear and surface hardness in abrasion of binary solid-solution alloys in the copper–gold system (1 plate) . . . . D. S. Lin and H. Wilman 561
Thermal conductivity of metals at high temperatures by the Jain and Krishnan method: I—Nickel . . . . S. C. Jain and T. C. Goel 573
CdS–metal barriers from photovoltage measurements . . . . M. Bujatti 581
Thermomagnetic effects in cadmium arsenide . . . D. W. G. Ballentyne and D. R. Lovett 585

PAGE
The activation energies of chromium, iron and nickel in gallium arsenide . . . G. A. Allen 593
Low-angle grain boundaries in natural barite single crystals (2 plates) . . . A. R. Patel and J. Koshy 603
Analysis of multiple relaxation processes . . . R. Holmes and M. A. Stott 607
Measurement of the quantum efficiency of noble-gas scintillators for x-rays . . . A. E. Kiss and N. Patla 617
The statistics of the generation of delayed pulses by the photoelectric effect as observed in a double counter experiment . . . R. Boucique 625
The form effect in prolate spheroids of magnetically saturated polycrystalline materials: I . . . R. R. Birss and S. R. Adamson 631
Sub-critical measurements of buckling and migration area using spontaneous fission as the primary neutron source . . . M. Ahmad and M. J. Harris 645

RESEARCH NOTES

The temperature dependence of sonoluminescence from water . . . K. J. Taylor and P. D. Jarman 653
Effect of azimuth variation on hysteresis loops obtained from the transverse Kerr effect . . . R. Carey, E. D. Isaac and B. W. J. Thomas 656
Note on discharges in helium under a.c. conditions . . . R. Bartnikas 659
The choice between single-ended and balanced r.f. sputtering systems . . . P. A. B. Toombs 662
BOOK REVIEWS . . . 665

LETTERS TO THE EDITOR

Comments on the paper 'The measurement of the principal dielectric constants of sapphire by a mechanical action method' . . . A. C. Lynch: W. L. V. Price 669
Comments on the paper 'The dielectric constant of zirconia' . . . B. Cox: P. J. Harrop and J. N. Wanklyn 671

JUNE 1968

PAPERS

PAGE
The absorption and atomic number corrections in electron-probe x-ray microanalysis . . . H. E. Bishop 673
Electron penetration and the atomic number correction in electron probe microanalysis . . . J. Philibert and R. Tixier 685
The determination of some x-ray mass absorption coefficients . . . G. D. Hughes, J. B. Woodhouse and I. A. Bucklow 695
Measurement of the Pockels effect in quartz at 9 GHz H. Pursey and R. J. Newman 707
Laser-induced electron emission from tungsten, tantalum and lanthanum hexaboride using ruby and argon lasers . . . L. G. Pittaway, J. Smith, E. D. Fletcher and B. W. Nicholls 711
The spectral response of Cu_2S–CdS photovotaic cells . . . R. J. Mytton 721
Further characteristics of a molecular beam maser oscillator operated with two cavities in series . . . A. L. S. Smith and D. C. Lainé 727
Optical absorption in silicon monoxide . . . I. R. Rawlings 733
Far infra-red Faraday effect in rare-earth iron garnets . . . P. G. Frayne 741
Static and recovery characteristics of wall-stabilized d.c. arcs in nitrogen . . . K. R. Hearne and M. Rasul 753
The ratio of diffusion coefficient to mobility for electrons in nitrogen and hydrogen . . . M. S. Naidu and A. N. Prasad 763
Ionization coefficients in nitrogen . . . J. Jones 769
Self-sustaining dipole discharge in oxygen . . . N. T. Dzoanh 775
Dynamic behaviour of grid blackout in u.h.f. pencil triodes . . . J. R. Andrews and N. S. Nahman 781
The form effect in prolate spheroids of magnetically saturated polycrystalline materials: II . . . R. R. Birss and B. C. Hegarty 789
The elastic constants of an isotropic matrix reinforced with imperfectly oriented fibres . . . J. Cook 799

RESEARCH NOTES

Joshi effect under pulsed illumination . . . B. L. Chotia, R. Kikuchi, M. Kawanishi and T. Nogaito 813
Heat transfer through a three-phase porous medium . . . D. R. Chaudhary and R. C. Bhandari 815
BOOK REVIEWS . . . 819

PAGE

JULY 1968

PAPERS

PAGE

The simulation of domain wall motion in square loop ferrites, and other aspects of wall behaviour . . . . J. E. Knowles 821
Electrical properties of Hg_3Te_3–In_2Te_3 alloys . . D. A. Wright and S. L. Dahake 831
Optical properties of tin di-selenide single crystals . . . . P. A. Lee and G. Said 837
Valence band structure of SnTe . . . . L. M. Rogers 845
Computer solution of depletion and accumulation layers and analysis of abrupt n–n heterojunctions . . M. J. Hampshire, G. A. Wilson and M. M. Chadda 853
The high-temperature thermal conductivity of sintered uranium dioxide (1 plate) . . . . J. B. Ainscough and M. J. Wheeler 859
Single-crystal growth from the vapour and etch pit studies in arsenic (2 plates) . . . . A. P. Jeavons and G. A. Saunders 869
Electron probe microanalysis of metal oxides: comparison of correction methods . . . . C. A. Friskney and C W. Haworth 873
Mechanisms of electrical breakdown in mercury vapour . . . . G. D. N. Overton and D. E. Davies 881
Ion conversion in an argon afterglow . . . J. C. Cronin and M. C. Sexton 889
Solutions of the electromagnetic flowmeter equation for cylindrical geometries . . . . Roger C. Baker 895
The analysis of transients in pulsed LCR circuits with appreciable skin impedance . . . . R. D. Medford and M. Pelovitz 901
Moiré patterns formed by inclined gratings (1 plate) . . . . P. S. Theocaris 913
The entry of aerosols into sampling tubes and heads . . . . C. N. Davies 921

RESEARCH NOTES

Ruby laser damage associated with a liquid Raman frequency changer (1 plate) . . . . A. J. Gibson 933
Lattice parameter measurements on molybdenum disulphide (1 plate) P. A. Young 936
Electrical properties of annealed films of indium arsenide . . . R. P. Howson 939
Transverse initial susceptibilities of coupled films . . . . . E. D. Isaac 942
The transverse Kerr effect in cobalt thin films and its application to a simple hysteresis loop plotter . . . . R. Carey, E. D. Isaac and B. W. J. Thomas 945
The electro-optic effect in proustite (Ag_3AsS_3) . . . . . J. Warner 949
The ordering temperature of Cu_2MnAl T. Ohoyama, P. J. Webster and R. S. Tebble 951

BOOK REVIEWS 953

LETTERS TO THE EDITOR

Densities of indium–cadmium solid solutions . . . . N. Ridley 955

AUGUST 1968

PAPERS

PAGE

A new synthetic scattering kernel with applications in neutron transport theory . . . . M. M. R. Williams 957
The luminescence emission of cadmium telluride at 77°K F. J. Bryant and E. Webster 965
Simple transient and non-linear analysis of high-field domains in GaAs R. Harrison 973
A study of CdS thin-film deposition . . . . M. Bujatti 983
The magnetostatic energy associated with a polycrystalline ferrite . J. E. Knowles 987
Flux jumping phenomena in sputtered cylindrical niobium films . . . . P. Hlawiczka and J. M. Ross 995
Magnetic damping in terbium . . . . . . C. F. Burdett and R. B. Layng 1005
Electrical conduction in liquid air and liquid nitrogen S. W. Byatt and P. E. Secker 1011
Ion mobility and liquid motion in liquefied argon . . T. H. Dey and T. J. Lewis 1019
Dipole and quadrupole planar magnetic fields produced by line currents F. Deutsch 1031
A calculation of the elastic constants of a unidirectional fibre-reinforced composite . . . . M. D. Heaton 1039
Load transfer from broken fibres in composite materials . . . . N. J. Wadsworth and I. Spilling 1049

RESEARCH NOTES

Some measurements of isothermal compressibility by a capacitance method . . . . D. F. Gibbs and B. W. Jones 1059
Magnetoresistance in a p-type PbTe–CdTe alloy at 77°K . . . J. M. Brettell 1064
Drift mobility of light-mass holes in PbTe heavily doped with Na . L. M. Rogers 1067
The effect of absorbed argon on the properties of thin copper films . T. J. Coutts 1071

PAGE
Some observations of sheath radius in hydrogen-filled SC1 corona discharge tubes . . . . F. A. Benson, D. J. Mellor and J. R. Travis 1073
Influence of hydrogen on the internal friction of nickel . . . . P. Combette, J. Perez and P. Gobin 1075
The elastic constants of $Hg_5In_2Te_8$. T. Alper, N. G. Pace and G. A. Saunders 1079
The value of the breakdown voltage in hot alkali-metal-seeded rare gases . . . . H. I. Ellington 1082
The tribonucleation of bubbles . . . . J. Campbell 1085

LETTERS TO THE EDITOR

Reply to comments on the paper 'The application of a glancing angle x-ray diffraction film technique to the study of the low-temperature oxidation of iron–chromium alloys . . . . B. J. Isherwood and T. F. J. Quinn 1089
The relative intensities of K and L x-ray lines . . . . . S. J. B. Reed 1090
Total cross sections for 14·7 MeV neutrons . M. A. Gomaa and P. W. Nicholson 1091

SEPTEMBER 1968

PAPERS

PAGE
The ratio of K characteristic to total radiation emitted from a tungsten target x-ray tube . . . . P. Tothill 1093
The temperature coefficient of capacitance . A. G. Cockbain and P. J. Harrop 1109
Measurements of the thermal conductivity of thin films of magnetite . . . . J. Lis and P. O. Kellard 1117
The photoconductivity of CdS in the vicinity of the absorption edge . . . . C. E. Reed and C. G. Scott 1125
Photoeffects in semiconductors and allied devices with quadratic volume recombination . . . . S. Deb and M. K. Mukherjee 1133
Stacking-fault densities in hexagonal (β-phase) silver–antimony alloys . . . . M. De and Miss S. Sen 1141
Phase transformations in superconducting Ti–Nb alloys . . . . B. A. Hatt and V. G. Rivlin 1145
The effect of hydrogen on the electrical properties of rutile . . . . G. J. Hill 1151
Gas-space and electrode effects in the motion of low-current arcs . . . . . . N. R. Chaudhry, R. H. C. Newton, T. J. Lewis and P. E. Secker 1163
Boundary conditions in wall-stabilized arc columns . . . . D. W. George and P. H. Richards 1171
A mechanism for shock-induced electrical polarization in water . . Y. Horie 1183
Polarization of light on reflection by some natural surfaces . . . . Hsi-shu Chen and C. R. Nagaraja Rao 1191
Light-scattering photometer calibration . . . B. R. Jennings and H. Plummer 1201

Review Articles

P B Fellgett
The development of astronomical instrumentation during the past fifty years

D C Wyatt
The electromagnetic blood flowmeter

Papers

D A Tong
Reduction of line-shape distortion in super-regenerative spectrometers for nuclear quadrupole resonance

D A Tong
A simple Zeeman modulator for nuclear quadrupole resonance spectroscopy

G J Butterworth
Effect of detector response time on the distortion of spectral peaks of Gaussian shape

R Stedman
Proposal for a new determination of a standard lattice spacing

J W C Gates and S J Bennett
A confocal interferometer for pointing on coherent sources

G J Curtis
The application of Edser–Butler fringes to measurement of small fibre diameters

J P Flemming
A low energy scanned electron beam potential probe

W R Marsh
Irradiation vessel for high temperatures and pressures

C E Roe and G G Yates
An electronic arrangement suitable for measuring time mean products and squares in fluid turbulence at low frequencies

W N R Stevens
A differential ballistic technique for sensitive magnetization measurements on ferromagnets at low temperatures

D J Craik
The measurement of magnetization using Hall probes

D G Barbee and G H Endrud
A differential thermistor gauge for macroscopic velocity measurements in rarefied gases

A G Fabula
Theoretical frequency response of stagnation-region thin-film thermometers

J de Yong
A microrheometer for tensile testing of wood fibres

B J Bellhouse and F H Bellhouse
Thin-film gauges for the measurement of velocity or skin-friction in air, water or blood

L Molyneux
A timing device for the measurement of damping capacity in vibrating samples

D J Herrell
A versatile analogue circuit based on a novel method of division

K D Metzmacher and J E Brignell
Automatic measurement of nanosecond random time-lags

P B Coates
Fast measurement of short time intervals

C N Owston
Application of thermistors to optical pyrometry and temperature control

Notes on experimental technique and apparatus

BRITISH JOURNAL OF APPLIED PHYSICS
(JOURNAL OF PHYSICS D)

NOTES ON THE PREPARATION OF PAPERS

Manuscripts will be considered only if they have not previously been published or submitted for publication elsewhere. They may be in English, French or German, but an abstract in English must be provided.

The following instructions refer to the main points to be considered when preparing a paper for publication in one of the Institute and Society's Journals, and authors are asked to conform to these recommendations.

MANUSCRIPTS

Manuscripts should be typed in *double* spacing on paper not wider than 8 in. and not longer than 13 in. Only one side of the paper should be used, and a margin of 1–1½ in. should be left. As alterations in the text cannot be allowed once the paper is set up in type, authors should aim at absolute clarity of meaning and of typing, and should check the typescript carefully before submission. All manuscripts should be submitted in duplicate, and in addition to the fair copies, a set of small copies or prints of the diagrams (not larger than foolscap) must be attached to each MS. (This enables MSS. to be sent to two referees at the same time and so assists rapid publication.)

Title and Sectional Headings. The title should be as concise as is compatible with lucidity. Papers are usually divided into sections beginning with 1. Introduction, and ending with . . . Conclusion.

Abstract. An abstract should accompany each manuscript; it should state briefly the general aspects of the subject on which new information is presented, the main conclusions reached and the final numerical results obtained. The abstract is placed immediately after the title, name(s) of author(s), and place of employment of author(s). One extra copy of the 'title and abstract' page is required for the records.

Mathematics. It is not necessary to give detailed derivations of mathematical expressions and formulae when the work is straightforward; it is quite sufficient to indicate the method of treatment and the final results. When interested readers are likely to find the argument difficult to follow, fuller treatment is called for. Particular care should be taken with mathematical scripts, especially for expressions in the least complicated.

References. In the text bibliographical references are made by giving the name of the author and the year of publication in brackets, e.g. (Jones 1942), and details are given in the last section, 'References', where the references are arranged in alphabetical order of authors' names and in date order for each author. **Initial and final page numbers should be given for the papers quoted.**

Experimental measurements. Authors of papers on experimental measurements are advised to include information concerning the purity and structure (grain size, homogeneity, degree of working, phases present, etc.) of materials used. This should be as complete as the nature of the measurements being made requires and should include the source of the material and method of preparation.

DRAWINGS

Drawings should be in Indian ink on tracing cloth, tracing paper or white card, **with all lettering omitted**: lettering to a size suitable for reduction will be inserted by our draughtsman. The drawings should in general be not longer than 12 in., but sufficiently large to allow for reduction in printing, and the lines should therefore be bold; the frame lines of graphs should be slightly finer than those of the plotted curves. A margin of 1½ in. should be left. Essential photographs can be reproduced as plates, but they should be avoided when possible because of their expense. If authors are unable to submit drawings in the required form, arrangements can be made for these to be drawn and the cost price charged to the author. As stated above, small copies or prints of the diagrams must be included for the use of referees.

Full details are available in the Institute and Society's *Notes for Authors*, obtainable from the Managing Editor, The Institute of Physics and The Physical Society, 1 Lowther Gardens, Prince Consort Road, London, S.W.7.

Papers for publication in any of the Institute and Society's Journals should be sent to the Managing Editor at the above address. Submission of papers is not restricted to members of the Institute and Society.
